

Seeking a perimeter security solution for your sub-station, primary control center or other critical site?

CHOOSE PROTECH

- We're experienced in electric industry physical security.
- We understand the requirements of CIP-014 regulations as they relate to perimeter protection.
- Our staff are Certified Protection Professionals (CPP) and Physical Security Professionals (PSP).
- We work with transmission owners and operators as a third party partner to provide solutions that give early warning of potentially compromising situations like physical attacks.
- We are an APPA member.

Working as your partner, Protech will ensure the site specification and perimeter security solution are a match with CIP-014-2 regulations to ensure your site's security is never compromised.

OUR PERIMETER SECURITY SOLUTIONS

- Meet regulation standards
- Require no infrastructure
- Easy to install
- More cost-effective than other systems
- Solar powered
- Highly reliable (99+% accuracy)
- Lowest Total Cost of Ownership in the security industry

WE GUARANTEE

EASY INSTALLATION: Independent barrier, no civil engineering or cabling required.

RELIABILITY: Communication through secure radio protocol. High probability of detection.

RANGE: Protech has a full range of perimeter intrusion security technologies to address the varying footprints and requirements of the utilities sector.
